

Agronomic Summer Internship

Location: Forest, ON, Melbourne, ON and Petrolia, ON

Company: Lakeside Grain & Feed Limited

Industry Type: Agronomy

Job Type: Seasonal (April to August)

Overview

Lakeside Grain & Feed Limited is a joint venture partner with The Agronomy Company of Canada and is a leading supplier of crop input products for producers across Ontario. The group at Lakeside Grain & Feed Limited is looking for a self-driven and eager individual to join our growing team as an Agronomic Summer Intern. Within this role the successful candidate will have the opportunity to learn about agronomic practices used in both row and horticulture crops grown in Ontario.

Job Description

- Learn how to stage various row crops for nutrient and crop protection applications
- Take part in Lakeside's Crop Scouting program with row crop producers
- Learn how to soil and tissue sample
- Engage in next level agronomic practices, such as fertigation programming and use of various crop imaging to make product recommendations
- Establish your own Summer Research Project about an agronomic practice of interest to you

Technical Skills

- Self-Motivated – there is the opportunity for a large level of independent work in this role
- Open-minded attitude – with a wide variety of crops grown in Lakeside's trading area, there is a lot to be learned about both row and horticulture crops
- Willingness to work flexible hours as required during the season
- Extended periods of standing and other physically demanding jobs
- Ability to lift, move or carry objects up to 50 lbs

Qualifications

- Enrollment in a Post-Secondary Education (Diploma or Degree) in Agriculture or a related field
- Valid G drivers license
